Barker R.F., Idler K.B., Thompson D.V., Kemp J.D.,

"Nucleotide sequence of the T-DNA region from the Agrobacterium
tumefaciens octopine Ti plasmid pTi15955.";
Plant Mol. Biol. 2:335-350(1983)
-I- FUNCTION: REDUCES DEOXY-FRUCTOSYL-GLUTAMINE TO MANNOPINE.
-I- PATHWAY: AGROPINE / MANNOPPINE SYNTHESIS.
-I- SIMILARITY: BELONGS TO THE SHORT-CHAIN DEHYDROGENASES/REDUCTASES

-I- SUBUNIT: COMPONENT OF NUCLEAR RIBOPROTEIN COMPLEXES. I WITH ILE3 (By similarity).

-I- SUBCELLULAR LOCATION: Nuclear (By similarity).

-I- SIMILARITY: CONTAINS 1 RNA RECOGNITION MOTIF (RRM).

-I- SIMILARITY: CONTAINS 1 RANBP2-TYPE ZINC FINGER.

-I- SIMILARITY: BELONGS TO THE TET FAMILY OF RNP PROTEINS.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       P56959;

KERATINOCYTES.

KERATINOCYTES IN KRT2A ARE A CAUSE OF ICHTHYOSIS BULLOSA OF SIZMENS (IBS), A RARE AUTOSOMAL DOMINANT DISORDER DISPLAYING A TYPE OF EPIDERMOLYTIC HYPERKERATOSIS CHARACTERIZED BY EXTENSIVE BLISTERING FROM BIRTH. HYPERKERATOSES AND SHEDDING OF THE OUTER LAYERS OF THE EPIDERMIS (MOLTING) ARE OBSERVED IN LATER WEEKS.

MISCELLANEOUS: THERE ARE TWO TYPES OF CYTOSKELETAL AND MICROFIBRILLAN KERATIN: I (ACIDIC; 40-55 kDa) [K9 TO K20] AND I (NEUTRAL TO BASIC; 56-70 kDa) [K1 TO K8].
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           "Characterization
